INTRODUCTION

Once again it is our pleasure to present you with a copy of our new wholesale list.

As always, our endeavor is to grow the finest plants possible. By selecting the better type plants of all varieties and propagating from them we believe we have accomplished much toward this end; and have introduced many new superior varieties and types. All our plants receive the best possible care: they are root pruned and transplanted so as to develop a fine root system; they are sheared, sprayed, fed, cultivated and watered to assure compact, clean plants. Your orders are dug and handled by experienced men in the very finest manner, and prompt delivery in our own 32' closed trailer is available if you so desire. Our every effort is directed toward developing and growing good heavy plant material offered at the lowest possible price, and to merit your confidence and good will. Your patronage makes this possible and we wish to express our appreciation with a most hearty Thank You!

You are most cordially invited to visit either or both of our farms. Our office is located at Angelica, near Reading, Pa. Please address all correspondence here. (R. D. #1, Mohnton, Pa.) Our Maryland farm is located on the Eastern Shore at Chesterville, Kent County. My sons, LeVerne and Tim will be glad to show you around there. We look forward to the pleasure of your visit.

Yours sincerely,

ANGELICA NURSERIES

TERMS AND CONDITIONS

This list cancels all previous quotations and prices listed herein are subject to change without notice. Material offered subject to prior sale.

All prices are f.o.b. our nurseries.

All stock when especially selected in the nursery will be sold at prices commensurate with the values of the specimens chosen.

Terms: Deposit required on all orders to be held more than 60 days. Cash in advance unless satisfactory arrangement is made when orders are placed. 2% discount allowed. To those establishing accounts with us terms are 2% 10 days, net 30 days. Interest at 6% per annum to be paid after maturity.

Plants become your property upon delivery to carrier and we cannot be responsible for loss, damage, or delay in transit.

We express or imply no warranty as to productiveness or life of stock. We assume no liability for delay or failure in filling orders due to strikes, accidents, crop failures or other causes beyond our control. It is mutually agreed that our liability for untruthfulness to name is confined to free replacement or refund of purchase price.

Claims must be made in writing within five days of receipt of goods.

All orders are based on the distinct understanding that the purchaser agrees to the conditions of sale as stated above.

Please use your printed business stationery in all correspondence.

DELIVERY SERVICE

We can quite often arrange to deliver full trailer load orders with our own 32' closed van, for which a reasonable charge is made. Quite often, less than trailer load lots can be combined with other orders consigned to the same locality.

Delivery charges are always net, due and payable when stock is delivered.

WHEN PICKING UP STOCK WITH YOUR TRUCK please be sure to send a tarpaulin or suitable covering to protect your plants from drying out on the road. We will supply labor to load your truck and during the busy planting season can arrange to load your truck in the evening or Sundays if necessary.

AQUIFOLIUM (English holly)

English and Chinese hollies have been tested along with opaca varieties. By the same process of elimination we have selected varieties with good growth and fruiting characteristics and outstanding hardiness as well. Our stock plants have become well acclimated to Northern weather over the years giving us considerably harder strains; in many cases better than some so-called "hardy" opacas.

Pyramidalis Compacta—Small light green evenly spined leaves. Abundance of red fruit.

4" deep flat of own-root Hybrid Rhododendron Transplants

RHODODENDRON LINERS (Hybrids)

Rhododendron liners are cutting grown. They are transplanted from rooting media into 4" deep flats and pruned. They make one and two growths in greenhouse and/or shadehouse, are hardened off, cut out with a peat ball and individually wrapped in heavy waxed paper for pickup or shipment. They should be lined out under shade.

Varieties: Most standard varieties available as listed in B&B section, plus others. 'Connoisseur' and yellow varieties grown on order.

Standard varieties80 ea. per 100

'Connoisseur' & yellows — 1.00 ea. per 100

Quantity discounts on liners

1,000 to 5,000 plants — less 5%

over 5,000 plants — less 10%

Minimum order — 100 plants.

Order early—prior to November 1 for following Spring, to assure best selection of varieties.

With their strong fibre root system our cutting grown rhododendrons will definitely make a heavier salable size plant in less time without the weakness of union, suckering of understock and phytophthora (wilt) disease so common in grafted rhododendron.
